# PERSONAL SPACE

In the office with Petra Brockmann, Thomas Brockmann-Knoedler, Lucrezia Rugova, and Edmir Rugova, Co-founders of HOUSE OF ORGÆNIC Dubai

“The entire villa was planned and furnished with carefully selected natural materials such as aventurine, rose quartz, rock crystal, jade and blue quartz”

How long have you been in this space? The House of ORG/ENIC Dubai is home of true beauty, patented holistic hairdressing, and luxurious haircare treatments since October 2024.

Have you custom-built any bespoke pieces? Yes, the entire villa was planned and furnished with carefully selected natural materials such as aventurine, rose quartz, rock crystal, jade and blue quartz. Despite the restrained colours and delicate details, the

sense of space is emotional and inspiring. Every interior element in our premises is individually designed by us and custom-made from the highest quality materials. Alcantara-covered cupboard elements, cubes as seating that also serve as side tables and a large central table with an Alcantara surface are just a few examples of combining multi-functional design and aesthetics.

How do you think the interior reflects you? The villa is a place of letting go and el-

egance, where genuine and trustworthy craftsmanship is practiced. In six spacious and bright rooms, including a VIP Room for utmost discretion and exclusivity, clients experience the highest level of expertise. The store concept incorporates selected natural materials, Japanese washing lounges, traditional craftsmanship, timeless elegance, and ultimate comfort. Describe your taste in three words. Timeless, true, and authentic.
